

LieberLieber Connector APIS IQ-Software Help

The **LieberLieber Connector APIS IQ-Software** is an Enterprise Architect extension developed by **LieberLieber** in cooperation with **APIS Informationstechnologie**. It provides model data export from Enterprise Architect to MSR-FMEA-XML for APIS IQ FMEA software. LieberLieber Connector APIS IQ Software one of the [tool data integration solutions](#) provided by LieberLieber Software.

This tool is able to export structural, functional and diagram information from models. **LieberLieber Connector APIS IQ-Software** saves you time and money in your FMEA process by enabling you to reuse information from an architecture model for FMEA, which means it is no longer necessary to manually re-enter the same data (Step 1 and 2 in the FMEA process).
