

LemonTree Server

What is LemonTree Server

LemonTree Server is the server edition of LemonTree. LieberLieber provides an own setup to install LemonTree Server on server machines.

Multiple clients can use one LemonTree Server installation. Access is possible via Web-Client (supported clients see [LemonTree Server System Requirements](#)).

Features

LemonTree Server has (more or less) the same UI as LemonTree desktop. The differences are

- + LemonTree Server also deals with models that are stored in databases.**
- + It is possible to choose a search path for models. See [Search path for models](#).**
- LemonTree Server doesn't provide the possibility to save/load sessions.**
